

# COMMERCIAL ELECTRICAL & PLUMBING GROUP PROJECT SUMMERY

**PLUMTRIC SOLUTIONS PVT. LTD.**  
IN TOUCH BY ELECTRICAL & PLUMBING

**Introduction :-**  
**PLUMTRIC SOLUTIONS PRIVATE LIMITED INDIA.**  
**IN TUCH BY ELECTRICAL & PLUMBING**

**PLUMTRIC**  
IN TOUCH BY ELECTRICAL & PLUMBING

“ At plumtric solutions pvt. ltd. we are more than just plumbers; we are a dedicated team of certified professionals committed to delivering robust and reliable plumbing systems for commercial, industrial and institutional projects. With over 12 years of experience, we pride ourselves on our meticulous attention to detail, adherence to strict safety standards, and a customer-first approach that ensures every project is completed to the highest standards of quality.”

**Services Section :-**  
**Commercial & Industrial Plumbing**

- New Construction Installations
- Retrofitting and Renovations
- Process Piping Systems
- Drainage and Sewer Systems

**Industrial plumbing projects :-**

Industrial Plumbing projects are complex undertakings that are critical for the function, safety, and efficiency of a wide range of industrial and commercial facilities. Unlike residential plumbing, which primarily handles water, waste and gas for a home, industrial plumbing deals with high-pressure, high-temperature & often corrosive substances, requiring specialized knowledge, materials and equipment.

**Commercial plumbing projects :-**

**Commercial Plumbing** is a specialized field that handles the installation, maintenance and repair of water, sewer and gas systems in commercial & public bidings, such as office buildings, retail centers, schools and hospitals. Unlike residential plumbing, commercial projects are larger in scale and complexity, requiring specialized knowledge of building codes and high-volume systems.

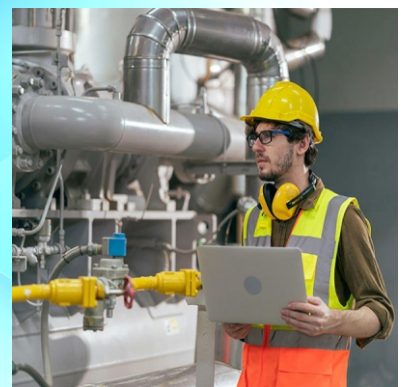

**Residential plumbing projects :-**

Residential plumbing projects in multi-family buildings like apartments and condos are significantly more complex than those in single-family homes. While they serve the same fundamental purpose-providing water, removing waste they must do so on a much larger and more intricate scale.

**1. Water Supply and Pressure Management :-**

**High Demand :-**

Multi-story buildings have a large number of residents using water simultaneously, especially during peak hours. The plumbing system must be designed to handle this high demand without a significant drop in pressure for any unit.

## Water Pressure Challenges :-

Gravity is a major factor in tall buildings. Unit on the lower floors can experience very high pressure, while those on the top floors may have very low pressure.

## Solutions :-

To manage this, our engineers and our professional plumber use :

### Booster Pumps :-

These pumps increase water pressure to ensure it reaches the upper floors with sufficient force.

### Pressure - Reducing Valves (PRVs) :-

These valves are installed on lower floors to lower the high pressure to a safe and manageable level, preventing damage to fixtures and pipes.

### Gravity Tanks :-

In some high - rise designs, large water storage tank is placed on the roof. Water is pumped to this tank, and then gravity is used to supply water to the units below, providing consistent pressure.

### Cutting - Edge Technology :-

We utilize the latest tools and techniques for precise and efficient work.

### Safety First :-

Our commitment to safety is a non-negotiable part of our process.

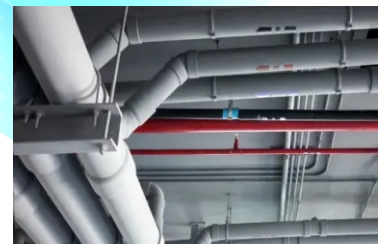

### Reliability & Timeliness :-

We understand project deadlines and work diligently to meet them.

“Ultimately, our goal is to give you peace of mind. We understand that your projects have timelines and budgets, and our focus is on delivering a electrical & plumbing system that not only meets but exceeds your expectations, with no surprises along the way.”

I encourage you to look at our work and see the quality we bring to every job.

I would be happy to answer any questions you may have and discuss how plumtric solutions pvt. ltd. can contribute to your next project.

### **Contact Information:-**

**Phone:** +91 96874 65066

**Email:** enpsvtltd@gmail.com

**Email:** dharamsinhplumtric@gmail.com

### **Company Network :-**

**Our team is available in 11 major districts of Gujarat like Ahmedabad , Surat, Vadodara, Anand ,Bharuch , Ankleshwar , Gandhinagar , Mehsana, Panchmahal , Bhuj And Nadiyad. We have channels in major Big cities of all over India.**
